Artificial Intelligence Application Development and Jira

Practical – 2(M2)

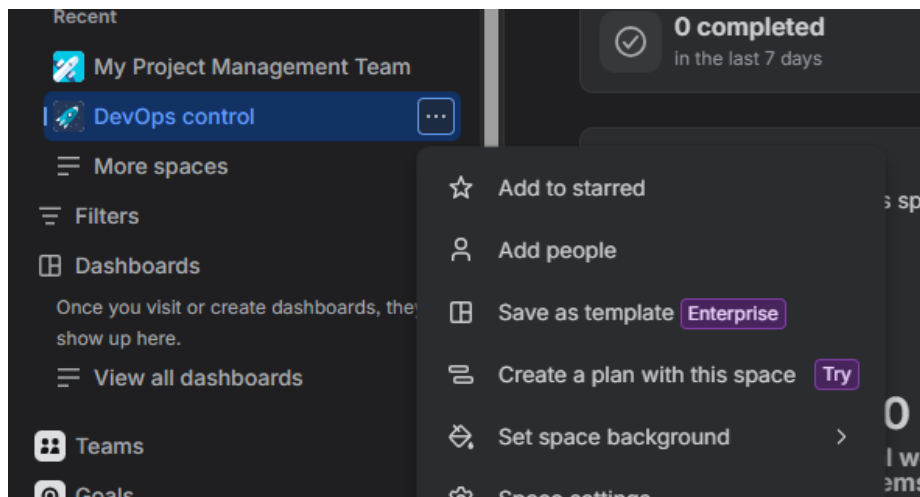

Roll No.: T005	Name: Ritesh Chaubey
Class: TYIT	Batch: 1
Date of Assignment: 02/09/2026	Date/Time of Submission: 02/09/2026

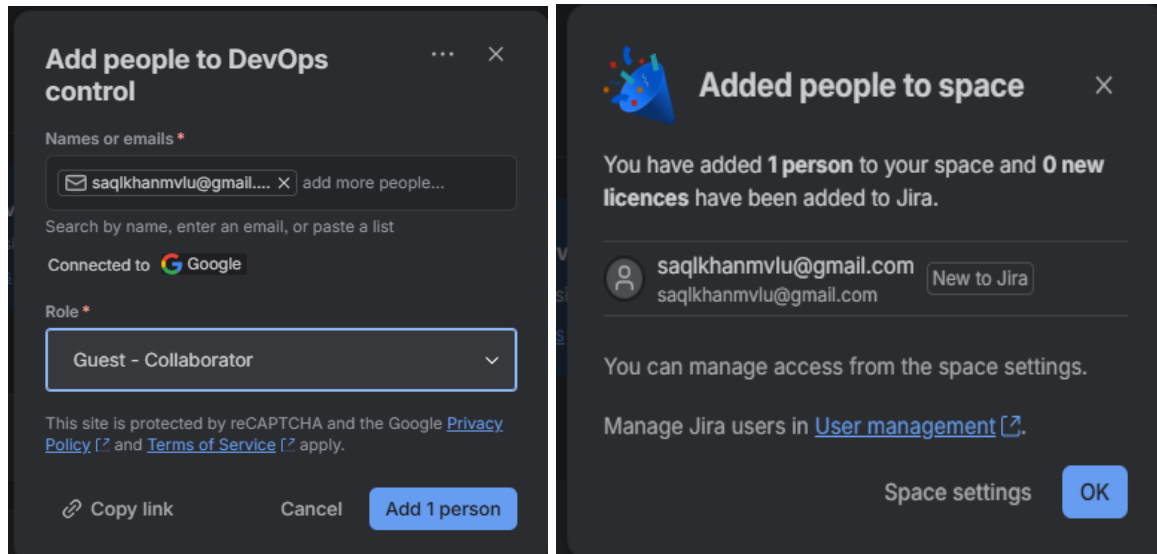

Practical 2: Team Creation & Role Assignment

A. Add Team Members

Steps

1. Open the previously created DevOps Control space.
2. Click the three-dot (⋮) menu next to the space/project name.
3. From the menu, select Add people.
4. The Add people to DevOps Control window will appear.
5. In the Names or emails field, enter the email address of the person you want to add.
 - You can enter more than one person if required.
6. In the Role field, select the appropriate role for the team member.
7. Select the required role based on the team member's responsibilities. For example:
 - Administrator – Provides administrative access to the space/project.
 - Guest – Collaborator – Allows the person to participate as a collaborator with limited access.
8. Verify that the entered email address and selected role are correct.
9. Click Add 1 person.
10. The selected team member will be added to the DevOps Control space with the assigned role.

B. Assign Roles

Steps

1. Open the previously created DevOps Control space.
2. Click the three-dot (⋮) menu next to the space/project name.
3. Select Add people from the menu.
4. The Add people to DevOps Control window will appear.
5. In the Names or emails field, enter the email addresses of the people you want to add.
 - Add multiple email addresses as required for the team.
6. Select the appropriate Role for the group of people.
7. Choose the role according to the responsibilities of the group. For example:
 - Administrator – For members who require administrative access.
 - Guest – Collaborator – For members who need to participate in project activities with collaborator-level access.
8. Verify the list of people and the selected role.
9. Click the Add people button.
 - The button may display the number of people being added, such as Add 3 people, depending on the number selected.
10. The selected group of people will be added to the DevOps Control space with the assigned role.
