Department of Information Technology (B.Sc.I.T Semester V)
Artificial Intelligence Application Development and Jira
Module - II

Roll No.: T005	Name:Ritesh Chubey
Class: TYIT	Batch: 1
Date of Assignment: 23-09-2026	Date/Time of Submission: 23-09-2026

Practical 9: Reports & Dashboards

A. Generate Burndown Chart and Velocity Chart.

STEP 1 - Open the required Jira project.

STEP 2 - Navigate to **Reports** from the project menu.

STEP 3 - Click **More Reports** to view the available reports.

STEP 4 - Select **Burndown Chart** from the list of reports.

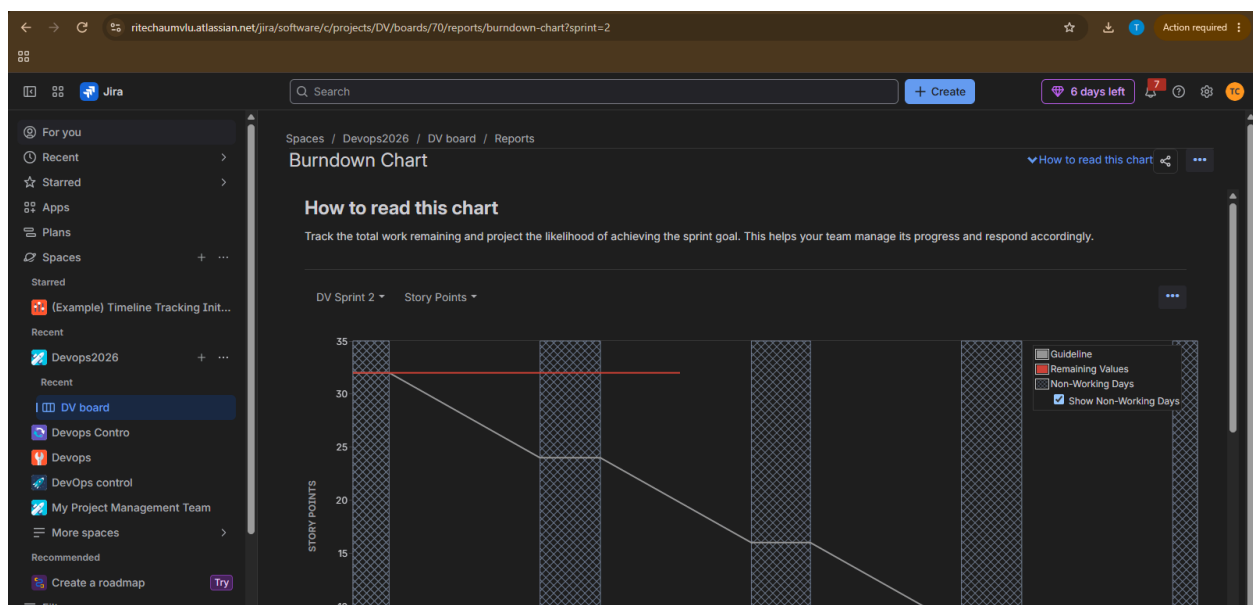

STEP 5 - The **Burndown Chart** will be displayed showing the project's remaining work over time.

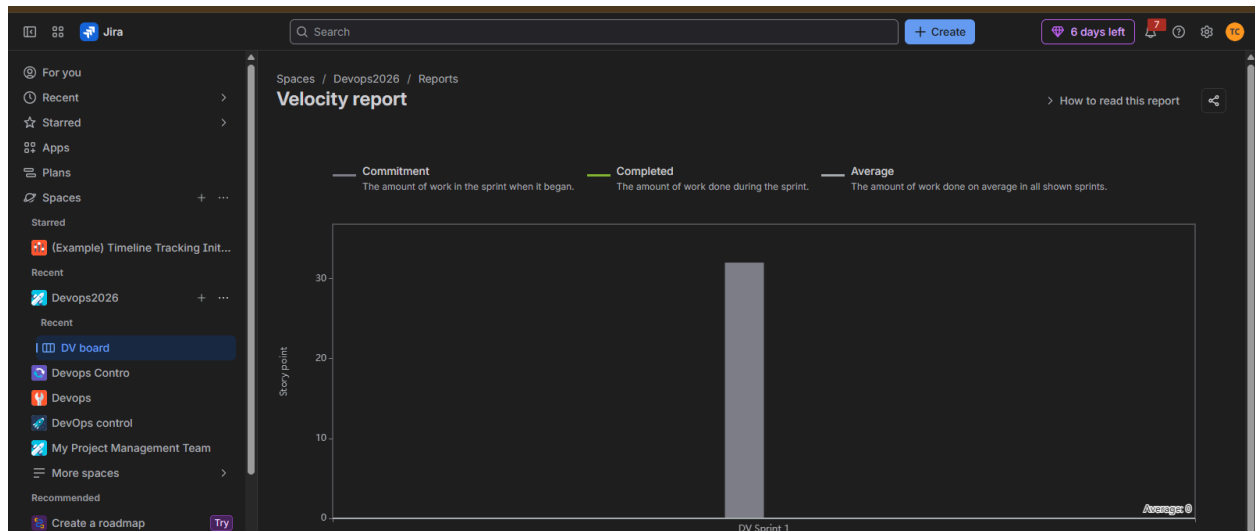

STEP 6 - Navigate back to **Reports** and click **More Reports**.

STEP 7 - Select **Velocity Chart** from the available reports.

STEP 8 - The **Velocity Chart** will be displayed showing the completed work across sprints.

Result :- The **Burndown Chart** and **Velocity Chart** were successfully generated in Jira.

B. Create Pie Chart / Issue Statistics Report.

STEP 1 - Open the required Jira project and navigate to **Reports**.

STEP 2 - Under **Issue Analysis**, select **Pie Chart Report**.

STEP 3 - Configure the required details for the Pie Chart Report.

STEP 4 - Click **Next** to generate the report.

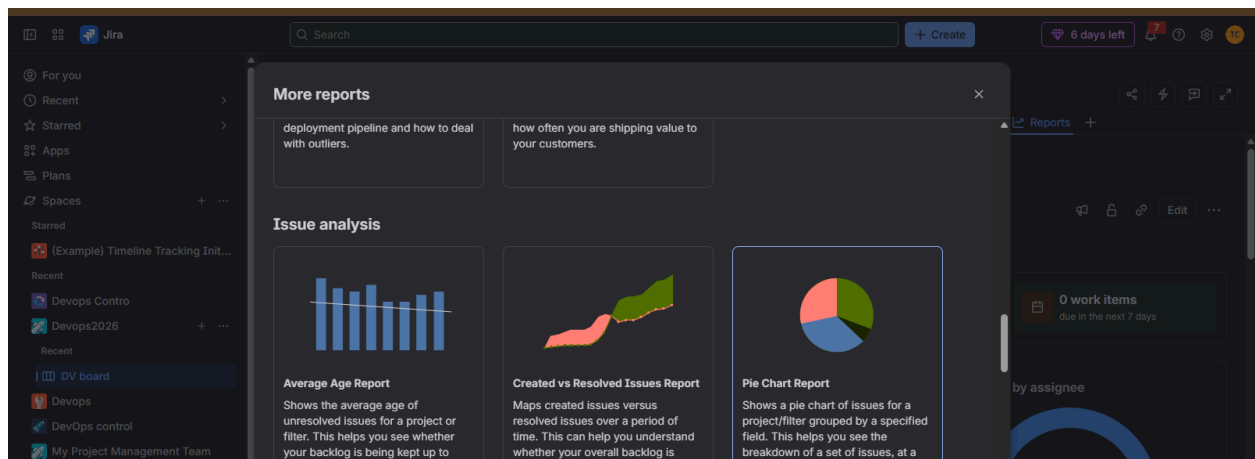

STEP 5 - The **Pie Chart Report** will be displayed based on the selected issue data.

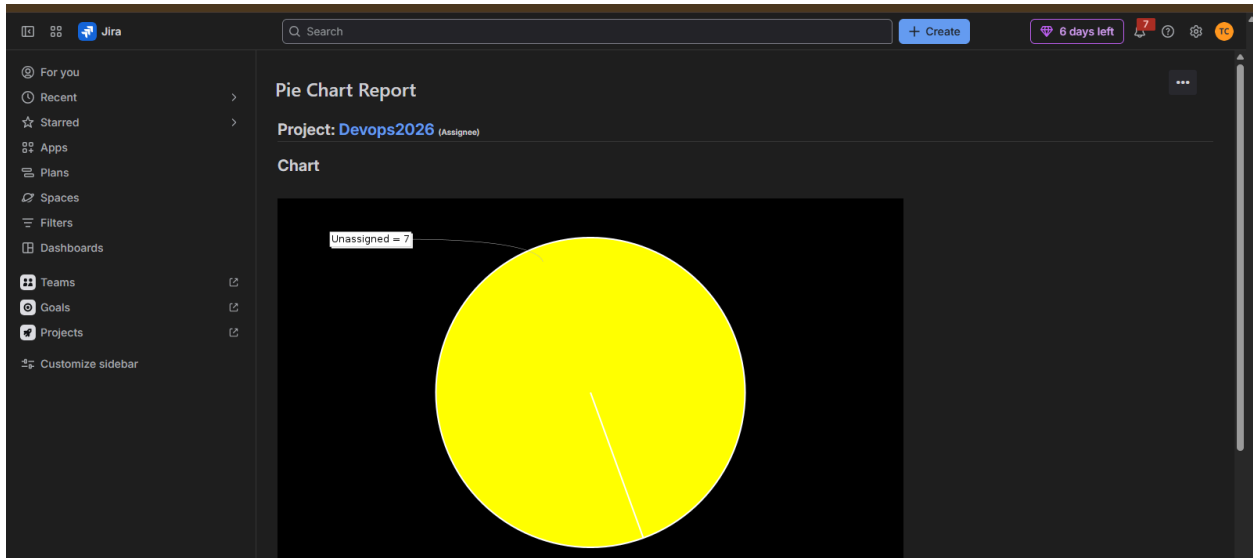

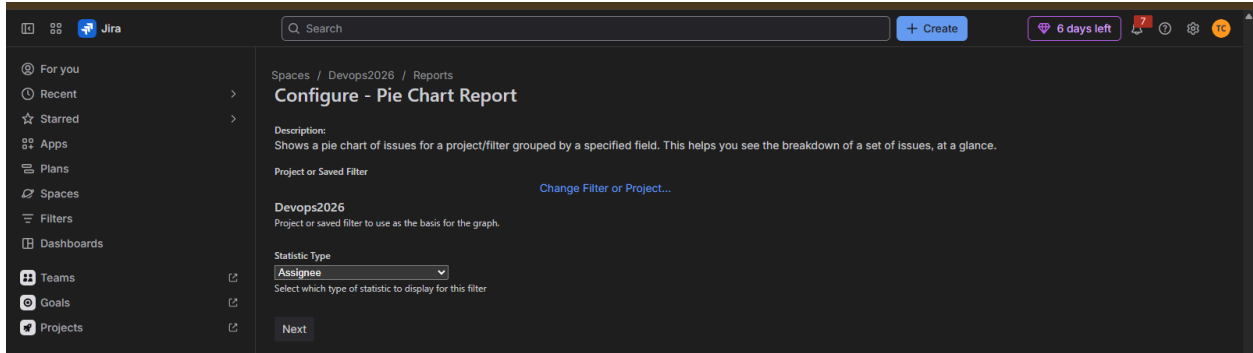

STEP 6 - Go to **Issue Analysis** again and select **Recently Created Issues Report**.

STEP 7 - Select the required **Period** for which the report needs to be generated.

STEP 8 - The report will display statistics of issues created during the selected period.

Result :- The **Pie Chart Report** and **Recently Created Issues Report** were successfully generated in Jira.

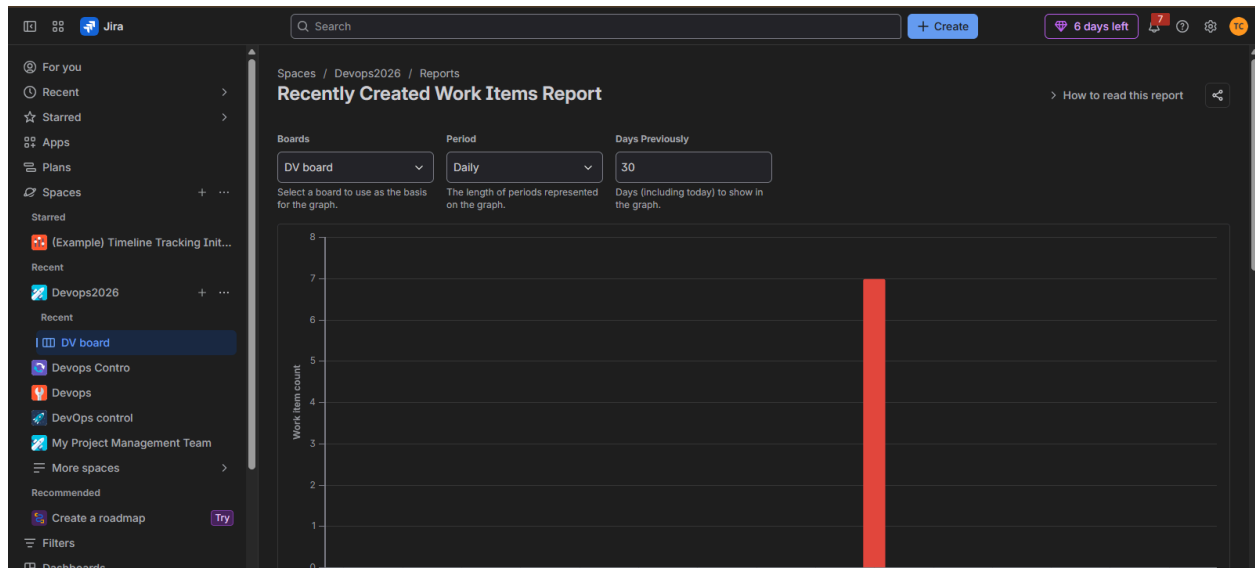

This screenshot shows the 'More reports' modal in Jira, which offers several report types for selection. The modal is titled 'More reports' and includes a close button. The reports listed are:

- filter.** This helps you see whether your backlog is being kept up to date.
- time.** This can help you understand whether your overall backlog is growing or shrinking.
- field.** This helps you see the breakdown of a set of issues, at a glance.
- Recently Created Issues Report**
Shows the number of issues created over a period of time for a project/filter, and how many were resolved. This helps you understand if your team is keeping up with incoming work.
- Resolution Time Report**
Shows the length of time taken to resolve a set of issues for a project/filter. This helps you identify trends and incidents that you can investigate further.
- Single Level Group By Report**
Shows issues grouped by a particular field for a filter. This helps you group search results by a field and see the overall status of each group.

The background shows a partial view of the 'Pie Chart Report' from the previous screenshot.

C. Create a Custom Dashboard with gadgets.

STEP 1 - Open Jira and navigate to the **Dashboard** section.

STEP 2 - Click **Create Dashboard**.

STEP 3 - Enter the required **Dashboard Name** and other necessary details.

STEP 4 - Add the required users or sharing permissions if necessary.

STEP 5 - Click **Add** to complete the dashboard details.

STEP 6 - Click **Save** to create the dashboard.

STEP 7 - The newly created custom dashboard will be displayed.

STEP 8 - Click **Add Gadget** on the dashboard.

STEP 9 - Browse the available gadgets or select the required gadget from the **Add a Gadget** panel.

STEP 10 - Add the required gadgets to the dashboard. Multiple gadgets can be added one after another.

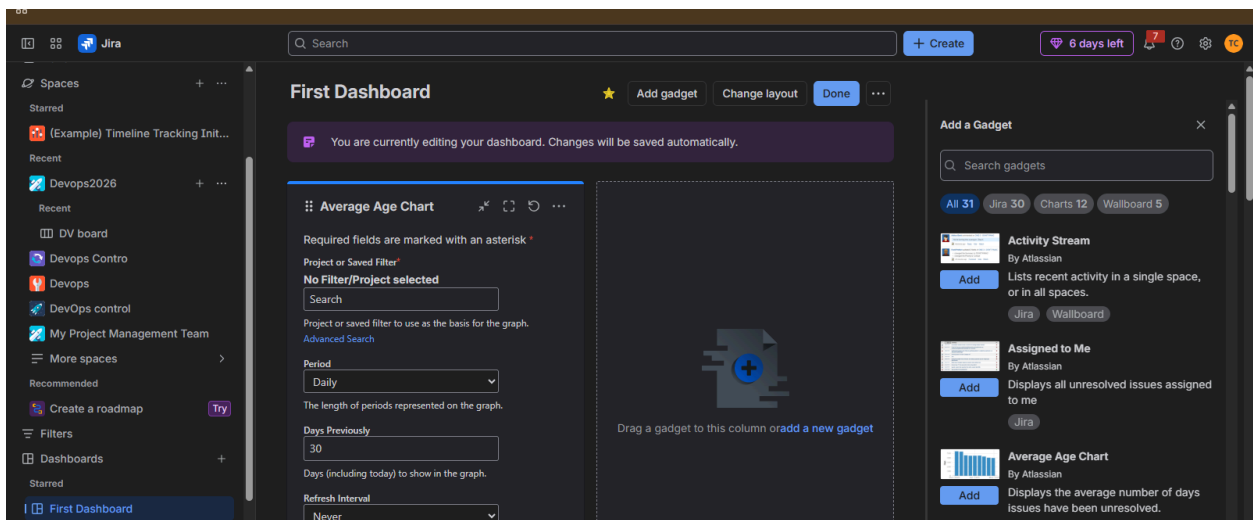

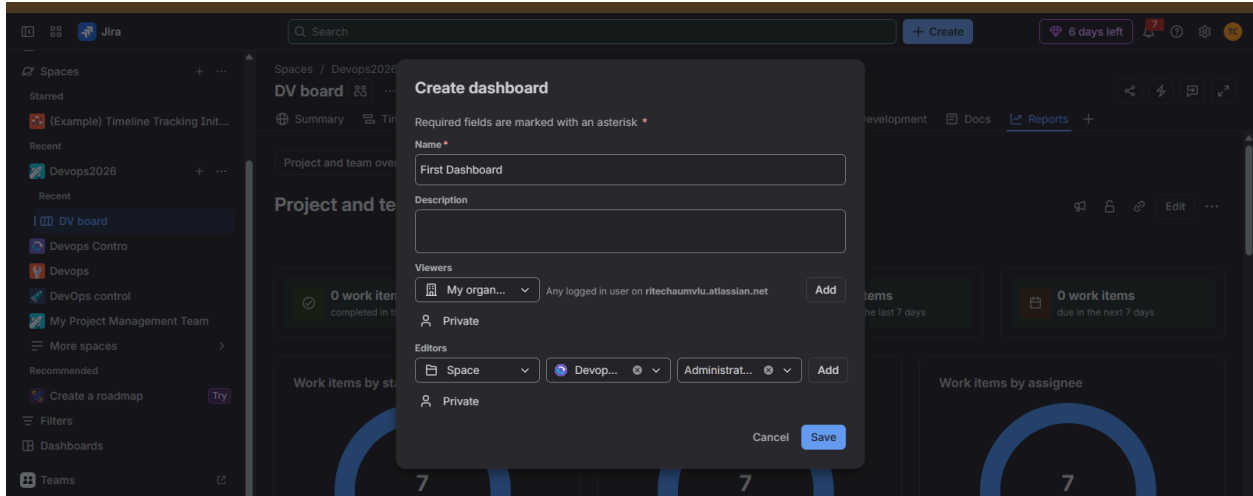

STEP 11 - Configure the selected gadget by providing the required details and settings.

STEP 12 - Click **Save** to save the gadget configuration.

STEP 13 - Repeat the process to add and configure additional gadgets as required.

STEP 14 - After completing the dashboard, click **Done**.

Result :- A custom Jira dashboard was successfully created with the required gadgets, and the gadgets were configured according to the project requirements.
