### Practical 3: Issue Types & Configuration

#### A. Create and configure Issue Types (Epic, Story, Task, Bug)

1. Open the DEV board in Jira.
2. Verify the Kanban columns:
3. Backlog
4. Selected for Development
5. In Progress
6. Done
7. In the Backlog column, click Create.
8. Enter Team Interaction in the What needs to be done? field.
9. Click the Issue Type icon/drop-down.
10. Select Task.
11. Click Create/Enter.
12. Verify that Team Interaction appears as a Task in the Backlog.
13. Create another issue and enter Fix Homepage.
14. Select Bug as the issue type.
15. Click Create/Enter.
16. Verify that Fix Homepage appears as a Bug.
17. Create another issue and select Epic to represent a large body of work.
18. Verify that the Epic is created successfully.

## B. Create Components and Versions.

1. Open your DEV project in Jira.
2. Go to Project/Space Settings.
3. Select Releases/Versions.
4. Click Create Release.
5. Enter the required version details.
6. Click Save/Create.
7. Verify that the new version appears in the Version list.
8. Go to Components.
9. Click Create Component.
10. Enter the component details.
11. Click Save/Create.
12. Verify that the new component appears in the Component list.
